EXPERIENCE

Frontend React Developer Intern   May 2025 – July 2025
Devfrend Web Solutions Pvt Ltd.   *Delhi (Remote)*
- Built fully responsive React.js and Next.js applications using Tailwind CSS and JavaScript, focusing on reusable components, mobile optimization, and scalable UI architecture Improved performance, accessibility and project delivery efficiency by 20%,

Software Engineering Virtual Experience   March 2025 – April 2025
J.P. Morgan Chase & Co. (via Forage)   *Remote*
- Optimized backend architecture using Java and Spring Boot, reducing server response time by 30% and improving overall.
- Improve REST APIs and database queries to reduce loading time, speed up backend process, and enhance overall system reliability.

Frontend Web & Java Development Intern   September 2024 – February 2025
Octanet Services Pvt Ltd.   *Remote*
- Developed responsive web apps using React, Bootstrap, and Java, improving performance, usability, and cross-device accessibility.
- Collaborated on backend tasks using Java, enhancing integration and logic handling across multiple web-based projects.

PROJECTS

E-Commerce Website | *Html5, CSS3, JavaScript, Bootstrap, Framer Motion, CSS*   *Live Demo*
- Designed a fully responsive, scalable, e-commerce platform with enhanced UI/UX, increasing user engagement by 15%.
- Implemented Bootstrap-powered interactive components, improving navigation by25% and reducing bounce rates by 12%.
- Enhanced the website for mobile devices, increasing the mobile traffic by 20% within the first month of launch.

Real-Estate Website | *React, React Hooks, Modern CSS, Framer Motion, Animations*   *Live Demo*
- *Established* a fully responsive website showcasing projects and skills, resulting in a 40% increase in GitHub profile visits.
- Upgraded mobile optimization, achieving a 98% responsiveness score, improving user experience and engagement.
- Integrated Framer Motion for seamless animations, enhancing visual appeal and interactive user experience.

TECHNICAL SKILLS

- **Programming Languages**: **Core Java, JavaScript**, HTML5, CSS3
- **Frameworks/Libraries**: **React & Redux**, **Spring Boot**, **JDBC, JSON**, Spring MVC, API, **Bootstrap**, **Next JS**, **Tailwind CSS, Framer-Motion, ES6, Rest API's**
- **Databases**: SQL, **MySQL** (Query Optimization, Schema Design)
- **Developer Tools**: **Git, GitHub**, Postman (**API Testing**), WordPress, VS Code
- **Data Structure & Algorithms (DSA):** Created a JavaScript-based algorithm to optimize search functionality, decreasing latency by 150 milliseconds and improving accuracy by 20% for common queries.

EDUCATION

DAV Institute of Engineering & Technology (DAVIET)   Punjab, Jalandhar
Bachelor of Computer Applications (BCA)
- *CGPA: 7.5/10*   July 2021 – September 2024

PARTICIPATION

J.P. Morgan Software Engineering Virtual Experience: Simulated real-world software engineering tasks including Git collaboration, front-end Development, and data visualization.

CERTIFICATION

- **Front-End React Development & Java**
- **Software Engineering Certificate By J.P Morgan Chase & Co. (via Forage)**
